

History

Sentry Telecom has been doing business since July 1997. Sentry Telecom is a woman owned minority business in the communication industry.

Vision and Ability

Sentry Telecom exists to bring relief to projects and visions that appear overwhelming and bring your plans into reality. We are dedicated to adding value to the communications process and projects of our clients. We are accountable with competent leadership while fulfilling the needs of our clients through careful planning.

Sentry Telecom is a design/integration telecommunications company. We have completed projects for many large school districts, Data Centers, military bases, local government offices, as well as high security government buildings, healthcare buildings and many more. Sentry has the reputation for quality, accountability, integrity, and the professionalism it takes to competently service our clients.

What We Do

Sentry Telecom is capable of many services in the communications industry. Sentry integrates and designs business telephone systems, including VoIP servers, closed circuit digital security systems, access control systems that are most cost efficient to the customer; as well as, design and integrate any cabling infrastructure from copper wire to fiber optics. Sentry offers services such as consulting and resale of voice and data services. Sentry will represent your business to service providers so that you may focus on your business goals. Sentry Telecom will manage your cabling infrastructure in a data center environment. Sentry will install wireless enhancement systems for cellular and data environments.

Expectations and Experience

Expect Sentry Telecom to be professional and accountable, with integrity and a courteous attitude. We are committed to working with you to understand your needs and your goals in a cost effective manner to ensure your expectations are met. Your concerns are our concerns. Our technicians are trained to meet or exceed these satisfactions.
